Amendments to the Specification:

The amendment presented below is to correct a minor typographical error contained in the following paragraph and not for any other purpose. Accordingly, Applicants respectful submit that no new matter is added herein.

Please amend the paragraph beginning on page 12, line 27 as follows:

--Referring back to FIGS. [[1]] 4-8, the example is explained for each time point. Reference numbers are sometimes left out for convenience. Before and after time point T1, application 200 is sending database instructions 201 to source table 230 in source database 210 (step 405). For convenience of explanation, target table 240 in target database 220 and log table 250 are initially (at T1) assumed to be empty.--
